

W4D1

Dog Wheelchair - For Small Dogs 11-17 lbs

This small dog wheelchair is constructed with high quality aluminium that is designed to not bend, break or rust and then a powder coated finish is applied to add an extra layer of protection to your pets' wheelchair. Mini Dachshund, Jack Russell, Pug etc

- For dogs weighing 11-17 lbs with a leg measurement between 3-6 in
- Adjustable harnesses to provide optimal comfort & mobility
- Push button adjustability in height, length and width
- Durable, lightweight aluminium frame
- Transportable and storage friendly

After fitting one on your dog or other pet, they will be able to run and play again, get exercise, and live a happy, healthy life. This cart is designed to help pets with hip and leg problems including degenerative myelopathy (DM), hip dysplasia, arthritis, paralysis, slipped disc, soreness, spinal and neurological problems, surgical recovery, and more. Your dog will use his or her front legs to move, explore, and play, while the back legs are lightly touching the ground or safely held up in stirrups.

For more information and a quote please email me on the contact us page, with your name, address and telephone number. And a brief description of your dogs needs.

Note: Check with your vet before you purchase one of these.
